

AC-BP Brass Cleaning Pad

Data Sheet

Soft, coiled brass tip cleaner, often the preferred tip cleaning method that reduces the potential for tip contaminants

Compatible with all MX, MFR and PS work stands

Features and Benefits:

- Brass cleaning pads can be used in addition to, or in place of, a damp sponge to remove oxidation and contamination from soldering tips.
- The brass pad will expose the tip to less thermal shock and have a lower risk of becoming contaminated when compared to a damp sponge.
- Brass pad is softer than the iron plating on solder tips, but harder than the oxidation, resulting in a safe method to remove oxidation from tips without damaging the iron plating.
- Soft, coiled, brass tip cleaners are often the preferred tip cleaning method. They reduce the potential to introduce contaminants to the tip.
- 18 grams each.
- Sold in packs of 10.

Material:

- #890 Alloy w/ Cu-Zn (C280 Muntz)
- No coatings or flux added
